TRAINING TITLE

GAS SWEETENING & SULPHUR RECOVERY

VENUE

Dubai, UAE

DURATION

5 Days

DATES

14 - 18 November 2021

PRICE

US\$4,000 per attendee including training material/handouts, morning/afternoon coffee breaks and Lunch buffet.

TRAINING INTRODUCTION

The Gas and Liquid Contracts that exist (or are being negotiated) will determine the objectives of the processes that you will have to incorporate into any new facility and how you have to operate any existing facility. There exists a variety of processes that will condition your Natural Gas and Hydrocarbon Liquids to satisfy the Contract requirements. The objective of this course is to make you aware of the options available to you so that you can evaluate all the processes that will satisfy your objective to determine which particular process is the best from a capital cost and operating cost perspective.

TRAINING OBJECTIVES

Upon completion of this course, you will gain knowledge of the processes available to process your Natural Gas and Hydrocarbon Liquid Products.

TRAINING AUDIENCE

This course is designed for project managers, plant managers, plant supervisors, technical staff, and contractor personnel involved in project planning, process selection and operation of Natural Gas Production. The greatest benefit arises from considering all the processes that will accomplish your process requirements to determine which one is the best for your particular application from a capital cost and operating cost perspective. You will also be able to see which processes are available to you to de-bottleneck or modify existing processes. The practical

techniques and examples provide useful insights that are valuable at any stage of project execution and operation.

TRAINING OUTLINE

Gas & Liquid Process Selection

Contract Terms

Basic Consideration

Gas Contracts

- Quantity
- Quality
 - Heating Value
 - Sulphur Content
 - Maximum Temperature
 - Water Content (H₂O Dewpoint)
 - Hydrocarbon Dewpoint (HCDP)
 - Other (N₂, He, Ar, CO₂, Hg, O₂)

Liquid Contracts

- Commercial Ethane
- Commercial Propane
- Commercial Butane
- Butane-Propane Mixes (LPG)
- Propane HD-5
- Natural Gasoline

Overall Production System

Solution Gas

Associated Gas

Non-Associated Gas

Gas Processing Module

Gas Conditioning Module

- H₂O Removal (Dehydration)
- H₂S & CO₂ Removal (Gas Sweetening)
- Nitrogen Removal
- Mercury Removal
- Oxygen Removal

NGL Extraction Module

- Products
- Absorption (Lean Oil)
- Adsorption (HRU)
- Condensation
 - Mechanical Refrigeration
 - Mixed Refrigerants
 - Turbo Expander
 - Twister
 - JT Refrigeration
- Stabilization Module
- Product Treating Module

Characterization of Natural Gas & it's Products

Physical Properties of Pure Components

Ideal Gas Laws

- Boyle's Law
- Charles' Law
- Avogadro's Principle
- Dalton's Law
- Combined Ideal Gas Law

Physical Properties of Mixtures

Equations of State

- Van der Waals
- Redlich-Kwong (RK)
- Soave Redlich-Kwong (SRK)
- Peng Robinson (PR)
- Benedict-Webb-Rubin-Starling (BWRS)

Thermodynamic Properties

- Entropy
 - Enthalpy
- Equilibrium Ratio (K Value)

Separation

Types of Separators

- Horizontal
- Vertical
- Spherical
- Centrifugal
- Cyclone
 - o Reverse Flow
 - o Axial Flow
 - o Recycling
- Filter
- Liquid Coalescer

Water Vapour Removal (H₂O Dewpoint Control)

Water Content

- HC Liquids
- Natural Gas
- Effect of H₂S & CO₂

Hydrate Formation Temperature

- Effect of Propane
- Effect of H₂S & CO₂

CaCl₂ Dehydrators

MeOH Injection

EG Injection

IFPEX-1

TEG Dehydration

Solid Desiccant Dehydration

HCDP Control

Adsorption (HRU's)

- 2 TOC
- 2 TCC
- 3 TOC
- 3 TCC
- 3 TOC w/TGC
- 3 TCC w/TGC
- Purge Cycle

JT Refrigeration

- LTX
- LTS

Mechanical Refrigeration

- Variations

Twister

Refrigeration Compressors

- Compression Cycle
- Single Stage
- Single Stage w/Economizer
- Two Stage
- Types
- Drivers

Gas Sweetening

Terminology

Safety Precautions

Types of Contaminants

Process Selection

Chemical Reaction Processes

- Amines
 - Chemistry
 - Typical PFD
 - General Considerations
 - Amines Used (MEA, DEA, DGA, MDEA, TEA, DIPA, Formulated Solvents)
 - Control Variable
- Caustic Wash
- Chemistry

NGL Extraction

Low Temperature Mechanical Refrigeration

JT Refrigeration

Refrigerated JT Expansion

Adsorption (Lean Oil)

Turbo Expander

- Typical PFD
- Solid CO₂ Formation
- Solid Desiccant Dehydrator
- Inlet Compression
- Gas/Gas Exchangers
- Expander
- Re-Compressor
- De-Methanizer

Gas to Liquids

Sulphur Recovery

Claus Plan

Modified Claus Plants

- Typical PFD – 3 Stage
- Process Considerations
- Mechanical Considerations
- Instrumentation

Tail Gas Clean-up

- Incineration
- Super Claus 99
- Super Claus 99.5
- SCOT

Liquid Redox

TRAINING CERTIFICATE

MAESTRO CONSULTANTS Certificate of Completion for delegates who attend and complete the training course

METHODOLOGY

Our courses are highly interactive, typically taking a case study approach that we have found to be an effective method of fostering discussions and transferring knowledge. Participants will learn by active participation during the program through the use of individual exercises, questionnaires, team exercises, training videos and discussions of “real life” issues in their organizations.

The material has been designed to enable delegates to apply all of the material with immediate effect back in the workplace.
