**TRAINING TITLE**

SAFETY & LOSS PREVENTION - BEHAVIORAL APPROACH

**VENUE**

Dubai, UAE

**DURATION**

5 Days

**DATES**

13 - 17 June 2021

**PRICE**

US\$4,000 per attendee including training material/handouts, morning/afternoon coffee breaks and Lunch buffet.

**TRAINING INTRODUCTION**

The aim of this course is to improve awareness and to enhance the skills of participants in handling safety issues and preventing loss. The course adopts a behavioral perspective in highlighting the role of management and that of employees in ensuring a safe and efficient work environment.

The training focuses on improving organizational safety culture, increasing safe behaviors, problem solving using an empowered engineering solutions approach and a commitment to the value of zero accidents.

The course is interactive and consists of many practical examples and workshops, which have been designed and structured to enable the participants to implement safety procedures and significantly reduce material loss in their organizations after completion of the course.

**TRAINING OBJECTIVES**

- Participants will be able perform workplace hazard and safety systems assessments
- Control loss by anticipating workplace hazards and learn how to improve workplace safety systems.
- Develop self-sufficiency in managing workplace safety and health programs.
- Learn to significantly reduce the associated loss costs of insurance and prevent the pain, suffering and disruption associated with workplace injuries.

- Implement simple, affordable ergonomic work site evaluations workplace design changes
- Learn how to establish their own practical ergonomics program, which can avoid repetitive trauma injuries.

## **TRAINING AUDIENCE**

Management representatives, production managers, workshop managers and engineers

## **TRAINING OUTLINE**

- Overview of safety, accident prevention and loss prevention in the work place.
- Compiling data systems to provide early identification of trends to raise alertness to emerging loss activity.
- Interpreting the data and developing action plans to address the safety and loss issues.
- Improving employment risk management skills
- Reducing employment-related exposures through improved hiring practices, human resource policies procedures, and management training and accountability systems.
- Successful reversal of adverse trends before they compromise customers' ability to maintain the most affordable rates.
- Real-life suggestions that have practical application to industry-specific situation.
- Behavioral safety-training workshops and the use of survey tools to identify perceptions of the organization's safety culture and practices.

## **TRAINING CERTIFICATE**

**MAESTRO CONSULTANTS** Certificate of Completion for delegates who attend and complete the training course

## **METHODOLOGY**

Our courses are highly interactive, typically taking a case study approach that we have found to be an effective method of fostering discussions and transferring knowledge. Participants will learn by active participation during the program through the use of individual exercises, questionnaires, team exercises, training videos and discussions of “real life” issues in their organizations.

The material has been designed to enable delegates to apply all of the material with immediate effect back in the workplace.
