**TRAINING TITLE**

Technical Risk Assessment Training

**VENUE**

Dubai, UAE

**DURATION**

5 Days

**DATES**

19 - 23 FEBRUARY 2024

**PRICE**

\$5,250 per attendee including training material/handouts, morning/afternoon coffee breaks and Lunch buffet.

**TRAINING INTRODUCTION**

Industrial disasters can occur through combination of small failures, culminating in a major incident. All too often the small failures and defects go unnoticed until disaster strikes. These routes to failure can be predicted and avoided.

Health, Safety and Environmental Management Systems are based on a proactive approach aimed at the prevention of incidents as well as reactive monitoring of performance (including failures). Advanced Process Risk Assessment is required for all activities that impact on health & safety, production, asset, environment and the company reputation.

**In this Advanced Process Risk Assessment & Risk Management training course you will learn how to:**

- Improve your practical skills in applying advanced risk assessment techniques relevant to the process industry
- Consider the balance of risk against cost
- Motivate your people for improved safety culture
- Appreciate the role of Risk Assessment and Control Measures in the avoidance and mitigation of major hazards
- Understand the principles of incident causation and incident investigation

**TRAINING OBJECTIVES**

- Recognise the difference between hazard, risk and risk assessment
- Learn how to evaluate different types of risk
- Understand Control Measures and Mitigation Measures
- Develop the skills of applying advanced risk assessment techniques relevant to

the process industry

- Develop a strategy for planning and implementing risk reduction action plans
- Appreciate the contribution of human error to accidents
- Be able to understand the root causes of major incidents

## **TRAINING AUDIENCE**

- Management and those with responsibilities for analysing risks and incidents
- Production, project, process, mechanical, control, maintenance and HSE Personnel
- All personnel involved in implementing the Company's HSE Management System

## **TRAINING OUTLINE**

### **Day 1 - Advanced Risk Analysis**

- Introduction
- Some Major Industrial incidents to learn from
- Principles of Risk Analysis
- The ISO 31000 International Risk Management Standard
- Consideration of the Risk Analysis Framework
- Risk Evaluation Process and Risk Assessment Techniques
- Personal Safety and Process Safety
- An introduction to the concepts of Layers of Protection (LOPs)
- Process Safety: Control Measures and Mitigation
- Risk Assessment Tool: BowTie Diagrams as an Advances Risk Assessment Tool

### **Day 2 - Advanced Incident Analysis**

- Accident / Incident Causation
  - Active Failures and Latent Conditions
  - Barriers
  - LOPA
  - Review of the BowTie Diagram
- Investigating Accidents and Incidents
  - Incident Occurrences; Eye Witness Testimonies; Analysis Team
  - Gathering Evidence; Expert Support; Incident Sequence
  - Preliminary Causes; Root Cause Analysis; Human Factors
  - Risk Control Recommendations; Analysis Report
- Review the Barriers

### **Day 3 - Environmental Risks and the Human Factors in Accident Causation**

- Overview of Environmental Hazards, Risks and Risk Management
- Barriers and Environmental Risks
- Brief overview of Human Factors in Incident Causation
  - Sensory and Perceptual Processes
  - Individuals – Psychology and Differences
  - Perception and Decision Making
- Human factors, including errors and violations
- Improving Human Reliability: reducing the likelihood of errors and violations

### **Day 4 - Fires, Explosions and Toxic Releases**

- Types of Fires (including pool fires, jet fires, etc)
  - Fault tree analysis
- Explosions (LEL, UEL, and dust explosions)
- Pressure Explosion
- The DSEAR Risk Assessment
- Toxic Releases
- Incident Re-occurrence – Organizations Have No Memory

### **Day 5 - Health and Safety Culture**

- Hazard Report and Near Miss Reporting
  - What are the barriers to these?
- Introduction to Safety Culture
- Techniques for improving safety culture
- The role of the HSE Management System

### **TRAINING CERTIFICATE**

**MAESTRO CONSULTANTS** Certificate of Completion for delegates who attend and complete the training course

### **METHODOLOGY**

Our courses are highly interactive, typically taking a case study approach that we have found to be an effective method of fostering discussions and transferring knowledge. Participants will learn by active participation during the program through the use of individual exercises, questionnaires, team exercises, training videos and discussions of “real life” issues in their organizations. The material has been designed to enable delegates to apply all of the material with immediate effect back in the workplace.
